Abstract

Myocarditis is a diverse group of pathological entities caused by micro organism's and /or a primary inflammatory process causes myocardial injury. caxsackie virus A and B other enterovirus is most common cause. Lymphocytic infiltration of myocardium is most common. Although endometrial biopsy is diagnostic but they can be negative because inflammatory involvement of myocardium is focal or patchy. So that multiple separate area biopsy of myocardium is needed.

Keywords: Myocarditis, caxsackie virus ,Lymphocytic infiltration
